Overview

Creating the #1 global social commerce economy through the blockchain (e.g., shoppable Instagram for fashion & style).

- Bridge the gap between the inspiration of social media + functional and often disappointing ecommerce.
- Utilize our existing breakthrough patented fashion technology.
- Leverage industry expertise, network of brands, retailers & influencers combined with the CEO's vast experience from the likes of LVMH.
- Provide a cost effective, revenue driving channel for influencers and brands. Steamline the shopper's experience to discover & purchase must-have items.

Why blockchain?

- Give back users ownership and privacy of their social media data.
- Power the relationship between and properly reward influencers, shoppers, and brands, through tokenized incentives.

What are the problems we are trying to solve?

- Influencers are not being properly rewarded.
- Broken sales flow - gap between inspiration & sales conversion.
- Users lack control over their data - no ownership and privacy.

What is our solution?

Style.me is a tokenized fashion social commerce platform aiming to:

- properly reward fashion influencers while
- provide shoppable inspiring content for users, and
- provide targeted opportunities for brands based on users' opt-in data.

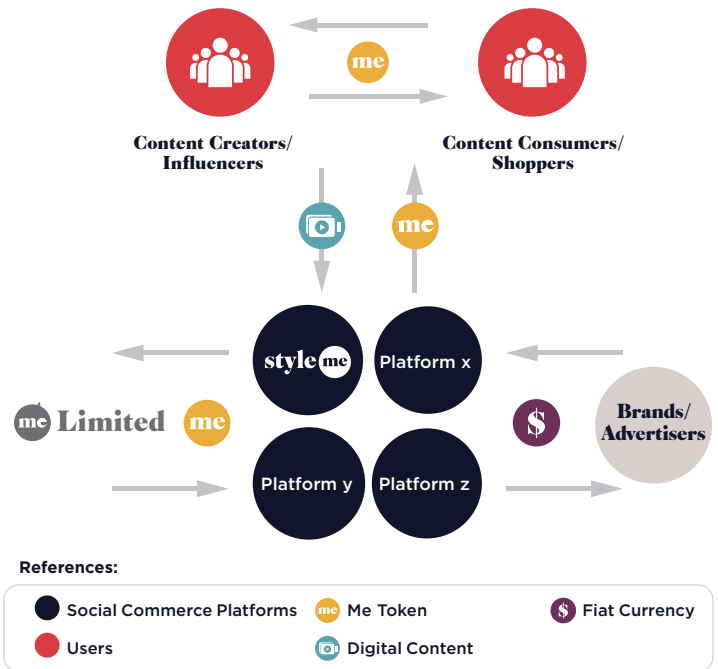

The platform connects and rewards activities of influencers, users, and brands:

- Influencers post brands' outfits, and can make affiliate commission from purchases.
- Users can like and share such posts, try on outfits in the patented virtual fitting room, and make purchases directly.
- Fashion brands are happy due to satisfied customers and valued influencers.

How do we scale in the future?

Aside from Style.me, additional verticals can leverage the opt-in function of the existing Style.me user base to jump start their own communities.
